

### How To Prolong The Life Of Your Boat Cover

- Avoid letting water or snow stand on the boat cover - use support poles, straps, or bows.
- Always tie boat cover down securely.
- Take the precaution of padding windshield, trolling motors, depth finders, etc. before installing boat cover.
- Allow boat cover to dry thoroughly before folding for storage.

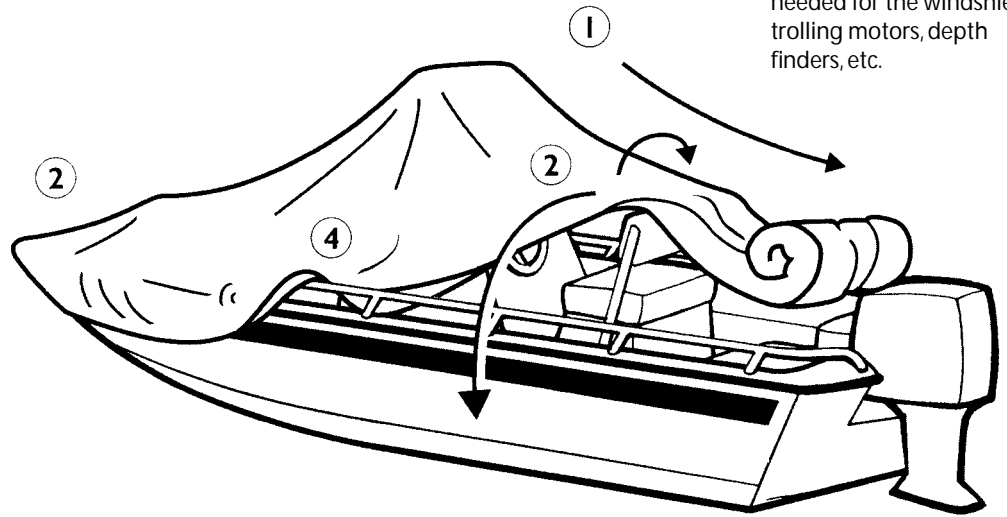

### Warranty

The materials and workmanship are guaranteed to be free of defects at time of manufacture. Warranty coverage commences on the original date of purchase. The warranty does not cover normal wear, weather soiling, stains from environmental pollution, and/or standing water, cuts from sharp objects, neglect, accident or misuse. The boat cover must be properly installed, utilized and maintained. The length of the warranty is determined by the type of material ordered. Please visit [www.carvercovers.com](http://www.carvercovers.com) for detailed warranty information.

## Installing A Carver Boat Cover

All Carver Boat Covers are rolled and packaged with the bow end of the cover to the outside. The tag on the bow end is sewn into the **inside** hem of the cover. To cover your boat, proceed as follows:

1. Place the bow end of the rolled cover on or near the bow of your boat and unroll towards the stern or back, positioning it down the center of the boat as you unroll.
2. Slip the front of the cover over the bow and pull the cover open to the sides as you work towards the back of the boat.
3. If using support poles (optional for most covers), position the poles under your cover prior to completely covering the boat. Also add any padding needed for the windshields, trolling motors, depth finders, etc.

4. Adjust cover fit by pulling cover tight to eliminate sagging areas. These areas may collect standing water or snow and shorten the life of your cover.
5. The braided tie-down rope provided can be used to secure the cover to the boat. Cut the rope to the desired lengths and using the reinforced tie-down loops, secure the cover to your boat.
6. Remove the boat cover by folding to the center from both sides and rolling the cover from back to front. This will make it easier to repeat steps 1 thru 5 when covering your boat again. **(Important: Allow the cover to dry thoroughly before folding for storage.)**

## Boat Cover Tie Down Kit

This is an efficient and sure method for securing a boat cover for trailering. Constructed of 1" black polypropylene webbing and convenient quick-release buckles. Unlike bungee cords, these durable tie-downs don't stretch, so they won't tear your cover or damage your boat. Each kit contains twelve 8' straps.

## Boat Cover Support Poles

Prevent dry rot and mildew! These lightweight telescoping poles are designed to support your cover so that water does not pool. Available in three styles. Each style is constructed of anodized aluminum tubing which can be adjusted to desired height.

## Adjustable (40" - 70") Support Pole w/ Boat Vent II

Replace a conventional support pole with one that provides an air vent to reduce moisture, heat and mildew under the cover. Includes adjustable anodized aluminum pole, boat vent and simple installation instructions.

## Boat Cover Storage Bag

This strong, lightweight and breathable storage bag is ideal for storing your boat cover when not in use. Convenient draw cord with barrel lock keeps bag securely closed. Bag is roomy 30" x 36" to accommodate virtually any size boat cover.

## Boat Cover Reinforcement / Repair Kit

This repair kit is an ideal way to prolong the life of your boat cover. Kit includes one yard of self-adhesive material. Use it to add extra padding to stress points from windshields, trolling motors, etc. or to patch wear areas and tears that may develop over time. Simply cut to desired size and apply to clean, dry surface.
