

CPR/CSR Covers

A part number that has CPR or CSR as a suffix is a Custom-Fitted cover that has a ratchet system in the hem. The "P" in "CPR" indicates Performance Poly-Guard® material. The "S" in "CSR" indicates Sun-DURA™ material.

These covers are designed to achieve a glove-like fit and are excellent for travel, mooring, dry stack and storage.

The ratchet is located at the back of these covers. It is encased in a protective vinyl pouch and secured in the hem with hook and loop as pictured:

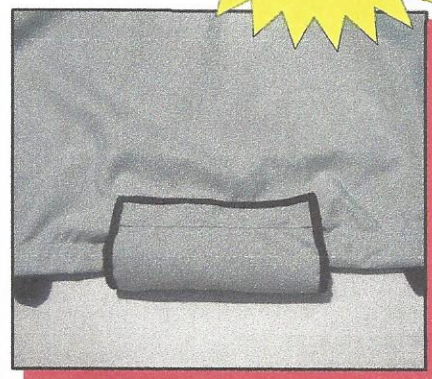

Quick & Easy Adjustment!

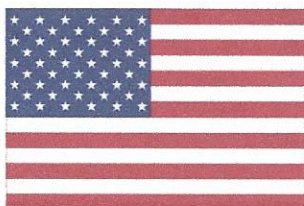

If the cover is designed to accommodate a boat with a Ski Tower, we have installed heavy duty double pull buckles in the hem at the tower openings. These buckles provide quick and easy adjustment at the openings and are also encased in the hem with hook and loop closure as shown.

Helps Achieve A Glove-Like Fit!

Ski boat CPR and CSR covers fit underneath the rub rail. To cover the swim platform, please see the boat cover accessories page for our separate swim platform cover or refer back to the guide for additional custom cover options that do provide built in swim platform coverage.
