LOUNGE ASSEMBLY INSTRUCTIONS TWO WAY OPENING LOUNGE (Z BAR)

A

- You will have one carton containing a cushion seat and a base with Z-Bar attached which will make a complete set of lounge seats.
- The only tool needed is a Phillips head screwdriver.

B

- Lay the lounge cushions out fully extended, with the cushion side down (see illustration).
- Remove the 8-1/4" x 1-1/2" screws and washers. They will be the attachment hardware to fasten the upholstered base to the lounge cushions.

C

- The upholstered base has a cross section with two air holes in it. With the base in the inverted position and the Z-Brackets extended as shown in the illustration line up the holes in the brackets with the holes in the seat boards.
- Place the washers and screws into the holes. Finger tighten until you get the screws started.
- Finish tightening the screws until you have a snug fit. This will complete all necessary assembly.
- Carefully turn the completed lounge over so that the base supports the cushions. You will then be able to fold the lounge cushions into the base in it's upright position.
- The lounge is now ready for installation in the boat.
